PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

FIRST AID

IF IN EYES

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-248-7763 for emergency medical treatment information.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

There are no specific PPE requirements for applicators or handlers of this product. Wearing at a minimum, short-sleeved shirt, long pants, shoes and socks is recommended.

ENVIRONMENTAL HAZARDS

This pesticide is highly toxic to birds, fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Note: Presence of alternate food sources will reduce effectiveness of the bait. To achieve more effective kill, clean area and eliminate alternate food sources before application. **Wash hands with soap and water promptly after use.**

For use in and around the following areas: Homes, Apartment Buildings, Stores, Restaurants, Warehouses, Government Offices, Public Buildings and Institutions, and Research Facilities.

Apply bait only in locations inaccessible to children and pets, such as in cracks and crevices, or in tamper-resistant bait stations. Do not apply to animals. Do not treat portions of buildings where animals can feed on bait. Apply up to 0.5 oz per crack, crevice, void, or bait station up to 4 to 6 oz of bait per 1,000 sq ft. For other surfaces inaccessible to children and pets, apply bait lightly

to floors near baseboards, in closets, under sinks, refrigerators and other appliances, vending machines, drop ceilings, wall voids, pipe chases, electrical conduits, around drains, elevator pits, around and inside garbage cans and in other areas where listed insects or their signs are found. Use approximately 4 to 6 ounces of bait per 1,000 sq ft of space and scatter lightly so that bait is barely visible. Bait may be broadcast in unfinished attics, basements and crawlspaces. Replace bait as it is consumed.

For use in the following areas: Restaurants (food areas), Poultry Packing, Red Meat Packing and Food Processing Plants, including Plants that are Federally Inspected, as well as Food Processing Areas of Stores, Warehouses, Government Offices, Public Buildings and Institutions.

Only apply bait in cracks, crevices and other inaccessible areas, or in tamper-resistant bait stations, or on paper, pasteboard, or other material that will permit removal. Locate these bait stations on window sills, on floors near walls, beams, around doors and other entry points, support structures, walkways, garbage chutes/bins, refuse containers in storage areas and other areas where insects have been observed. Maintain strict account of location and number of bait stations. Do not apply bait to any surface where food is stored, prepared, or served. Do not apply bait in edible product areas until operations have ceased for the day. Remove all bait stations from the edible products areas before resuming operations. Do not store Lava-Lor™ Granular Bait in or around such processing plants.

For Outdoor Use Around Patios, Driveways, Sidewalks and Foundations Only: Apply bait evenly in a band 2 to 3 feet wide around foundations, patios, driveways or sidewalks at the rate of 4 to 6 oz per 1,000 sq ft of infested area, taking care to treat any cracks or crevices. Also treat beneath concrete drain splashpans.

Turf Application: Use a shaker container or mechanical spreader to apply bait evenly over the infested area at a rate of 4 to 6 oz per 1,000 square feet. Do not "water-in" the bait. For best results with mole crickets, irrigate the treatment area prior to applying bait, and make bait applications late in the day. Mole crickets come up to the surface to feed after dusk.

Sewer Application: Apply bait around manhole covers and on ledges inside sewers at a rate of 1 oz per 100 square feet.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store the product in a dry, cool place not reachable by children.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **Container Handling:** Nonrefillable container. Do not reuse or refill this container. Empty container by tapping sides to apply contents as directed in the Directions for Use. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by other procedures allowed by state and local authorities.
