Bait should be placed in areas inaccessible to children.

INDOOR: Apply gel indoors in areas where ants are seen, including areas behind the refrigerator, stove, around water pipes, in cracks and crevices on window and door sills. Renew bait as needed. Apply only in areas inaccessible to children and pets.

OUTDOOR: Apply small, pea-sized bait placements where ants congregate or are seen entering the building. Bait near or in cracks, crevices or void spaces around windows, door jams and sills, eaves, patios, garages, under stairwells, and crawl spaces. Other areas where ants travel, hide or nest may also be baited (i.e. fences, trees, tree holes and around concrete slabs and asphalt covered areas). Renew bait as needed, keeping in mind that outdoor gel placements may dry more quickly than indoor placements and may have to be replaced more frequently.
