SAMPLE

Intended for use by pest management operators.

A Minimum Risk Pest Control Product.

Keep Out of Reach of Children.

CAUTION:

SEE BACK FOR FIRST AID AND PRECAUTIONARY STATEMENTS.

Obtained by Global Safety Management, 1-813-435-5161 - www.GSMSDS.com

This product contains botanical active ingredients that are natural insecticidal compounds extracted from plants. Formulated with patented technology, the product is made to provide triple-action mosquito control including fast kill on contact, lasting larvae control in standing water and extended spatial repellency with lowest possible impact on user and environment.

The product can also be used indoors or outdoors to control ants, crickets, dermestids, earwigs, fleas, flies, gnats, lice, midges, millipedes, mites, moths, silverfish, spiders, stink bugs, ticks and other insect pests. May be used for in and around structure of environments including but not limited to: residential, commercial, municipal, schools, dormitories, hotels, offices, theaters, retail stores, airports, health care, daycare, nursing homes, shelters, public transportation and other locations where infestations may occur.

DIRECTION FOR USE: Read the entire label and **SHAKE WELL BEFORE MIXING AND USE.**

MIXING INSTRUCTIONS AND EQUIPMENT:

This product should be mixed only with water as instructed. Use equipment such as hand pump sprayers, hand pressurized compressed air sprayers, backpack sprayer, ULV fogger or any non-thermal conventional fogging/spraying/misting equipment. Clean sprayer before use. Shake product well before mixing. Add about half of required amount of water to the tank first and then add the required amount of product, then add the remaining water. Seal tank and agitate well before use. Apply directly on surface to the point of run off. Suggest using mixed solution within 24 hours and maintain light agitation during use. Rinse equipment tank, hose and nozzle with water after use.

MIXING AND APPLICATION RATE

Pests	Dilution Rate in Water	Application Rate
Mosquitoes and Larvae	8 OZ / finish gallon	
Ants, mites and other crawling insects	16~24 OZ / finish gallon	1 gallon /1000 sqf

This is a minimum risk pest control product and is exempt from EPA registration under Federal Insecticide, Fungicide and Rodenticide Act (FIFRA).
